Metal Detector Chain Conveyor for Aquatic Products

Spesification

The first digital metal detector with IPR in China and the sensitivity of it has reached the advanced level.

Application:

The equipment is widely used in Aquatic products,meat and poultry products, preserved food,flour products,dried fruit,vegetables ,chemical materials and so on to ensure contaminated product is detected.

Characteristics:

1. Adapt phase discriminating technology that can effectively refrain product effect;
2. Adapt advanced DSP technology and leading intelligent algorithm which can improve detection sensitivity and promote stability of the machine;
3. Be able to detect various metals like iron, stainless teel,copper and aluminum, etc;
4. LCD display, Chinese & English operating menu;
5. Self-learning function contributes to automaticallychoose suitable working parameters according to different products;
6. Memory function for registering various products(Max: Over 20 Items);
7. Simple conveyor structure makes it convenient to disassembleand assemble;
8. Special design of conveyor belt for aquatic products and frozen foods;
9. Made of stainless steel, fairly good waterproof ability;
10. Excellent quality with attractive price.
